

McCauley Drive East traffic pattern updates at U.S. Route 250

To improve traffic flow from McCauley Drive East (McDonald's side) to U.S. Route 250, left turns onto U.S. Route 250 east from McCauley Drive East are no longer permitted. Drivers may go straight or turn right to return to U.S. 250 east. If you choose to turn right, please continue on U.S. 250 west to the Midvale Exit to return to U.S. 250 east.

Additionally, signal timing has been adjusted to enhance traffic flow at this intersection. Law enforcement is present to help direct traffic.

ODOT and the contractor will continue to monitor traffic and make necessary adjustments to

maintain smooth flow at this busy intersection during construction.

Future traffic pattern changes will be shared as this concrete repair project progresses on U.S. Route 250 at the McCauley Drive intersection in Uhrichsville.

ODOT reminds motorists to expect travel delays in this area and to pay attention to signage indicating any changes in traffic patterns and lane closures. If possible, ODOT advises motorists to seek an alternate route to avoid delays related to this project.

The overall completion date for the project is October 31, 2025.
