U.S. Route 250/McCauley Drive intersection traffic impacts: Beginning Tuesday, November 4, at 11 p.m., the intersection of U.S. Route 250 and McCauley Drive in Uhrichsville will undergo temporary traffic pattern changes to allow for essential concrete repair work. The traffic pattern will be the same as that used during the project's late July and early August phase. However, a section of concrete in the middle of the intersection must be removed and replaced before the project is finalized. The expected completion date to reopen the intersection is November 9, 2025.
